

The Character environment pack

The Character environment pack is composed of:

- **characterenvironmentpack.zip** - Installer for windows/linux
- **characterenvironmentpack_osx.zip** - Installer for Mac
- **readmefirst.pdf** - Some installation notes
- **characterscriptsfinal.pdf** - Tutorial
- **characterenvironmentscripttutorial.zip** - Video tutorial (.mov)
- **runner_environment.zip** - Sample scene and bvh file

Installation notes:

- **Windows** - Open the characterenvironmentpack.zip file and choose your realflow folder to extract the content into.
- **Linux** - Copy the characterenvironmentpack.zip file to your realflow folder and extract the content.
- **Mac** - The installer characterenvironmentpack_osx.zip only works if realflow is located in the applications folder.

Manual Installation guide for character environment script pack:

All systems:

- 1) Extract the content of the zip file in a folder.
- 2) Copy the character folder into your realflow scripts folder.
- 3) Copy the content of icons folder into your realflow icons folder.
- 4) Copy the cgkit folder into your realflow python site-packages folder
